KEY HIGHLIGHTS

2019

- Nov 13, 2019 – UPS announced a series of service enhancements that will benefit up to 1.4 million postal codes across 41 countries and territories in the Asia Pacific region, opening opportunities for businesses to develop more resilient supply chain strategies as they look within the region for growth. The enhancements include day-definite guarantee with one day faster transit time for UPS Worldwide Expedited service within Asia, improved geographic reach of UPS Worldwide Express® services, reduced transit time by one day for various Asian markets and expansion of UPS Marketplace Shipping to 10 additional markets including Australia.

- Aug 1, 2019 — UPS released the findings of its 2019 UPS Pulse of the Online Shopper study™ study which tracks the online buying habits and expectations of consumers across Australia and the Asia Pacific, Europe, and the Americas. The 2019 Asia Pacific study featured, for the first time, the buying habits of business purchasers.

- Jul 17, 2019 — UPS released the 2019 UPS industrial Buying Dynamics Asia Pacific Study, which highlighted UPS’s strategic insights into the industrial manufacturing segment. This study allows large multinational companies or local SMEs to better understand the purchasing habits of B2B buyers in the Asia-Pacific region, providing insights for improving service quality both online and offline.

- Jul 9, 2019 — UPS completed the following as part of its strategy to bolster economic development in Asia:
  - **Shenzhen Asia Pacific Air Hub upgrades** increased the hub’s processing capacity by nearly 50 percent in preparation for volume gains in the coming three years. These enhancements improve both reliability and quality of service provided to UPS customers in Asia. The hub owns houses separate sorting and handling facilities for express and cargo shipments, on-site customs office and processing

Information is cumulative as at Q4 2019. Last updated January 2020.
– including China Inspection and Quarantine (CIQ) clearance for import commodities – and a dedicated 150,000 square metre ramp with 13 aircraft parking positions. Self-operated aircraft ground-handling provides UPS, as a logistics integrator, with greater control over the 86 weekly UPS flights in and out from the hub.

- **Improved the geographic reach of UPS Worldwide Express® services**, offering international shipping with time-definite deliveries in Australia, Hong Kong, Japan, Singapore, and South Korea.
- **Extended pick-up times by up to five hours** for export shipments from Japan, Taiwan, and South Korea, widening production windows and giving businesses additional time to fulfil customer orders.
- **Strengthened supply chain flexibility** with Saturday pick-up services in the U.S. enabling import shipments destined for eight markets in Asia to be delivered 1 day earlier than before.

**2018**

- Oct 12, 2018 – UPS introduced UPS My Choice to 13 markets in the Asia Pacific, including Australia, China, Japan, Malaysia, the Philippines, Singapore, South Korea, Taiwan, Thailand and Vietnam. Customers will have access to e-mail and text notifications that a delivery is on its way, a day before delivery alert and a delivery notification. In countries and territories where technology allows delivery change options, users can route packages to another address, opt to hold the delivery or reschedule for delivery on another day.

- Feb 8, 2018 – UPS announced the introduction of UPS Worldwide Express Freight™ Midday, in selected areas in Australia, Hong Kong, Japan, Malaysia, South Korea, Taiwan and Thailand. The service offers a committed delivery time of 12 p.m. or 2 p.m. from all 71 origin countries to 35 key destination countries that represent over two-thirds of global GDP.

- Feb 1, 2018 - UPS ordered 14 Boeing 747-8 cargo jets and four new Boeing 767 aircraft to provide additional capacity in response to accelerating demand for the company’s air services. All of the new jets will be delivered by the end of 2022, adding more than 9 million pounds of cargo capacity and providing the critical link for customers and markets around the world.
